I am a self-motivated, hardworking and enthusiastic person who enjoys both working within a team and on my own initiative. I have a willingness and capacity to learn in any situation. I am very competent in both written and verbal communication skills. I work well under pressure, have a flexible approach and the ability to deal with varied tasks whilst preserving attention to detail. I always maintain a positive attitude, enjoy problem-solving seeing any issues as a challenge, and embracing any opportunity to increase my knowledge.

## Employment

### Domain Group – Front End Developer / User interface Developer – June 2015 / November 2016

- I worked as the sole user interface developer with the Commercial Real Estate team ([commercialrealestate.com.au](http://commercialrealestate.com.au) - one million sessions per month) within the Domain group.
- Part of a team of thirteen, I was responsible for the front end architecture and enhancement of the website's fully **responsive user interface**.
- With a high level of accountability, I was hired specifically to create more structure and maintainability in the front end code, with attention to detail and consistency on the UI.
- With very little existing tooling and structure in the **CSS** and **HTML**, I improved processes by implementing **Gulp**, and created a highly **maintainable CSS architecture** using **SASS**, along with **Atomic CSS** and **BEM** methodologies.
- Very close **collaboration** with the developers, UX, design, tester and product team in a fast paced, highly **Agile environment**.
- Notable statistics in my period of employment: **400% increase** in sessions per month, **600% increase** in sessions to **mobile**, **71% improvement in bounce rate**

### Reactive Media – Front End Developer / User interface Developer – July 2011 / May 2015

- Reactive Media (since acquired) was one of the largest digital agencies in Australia with offices over the globe providing digital solutions to a wide variety of clients, including Governmental
- Clean, highly considered and cutting edge coding techniques using **CSS** and **HTML** and **Javascript** with a strong consideration for **accessibility** and **SEO**, whilst consistently developing knowledge and cutting edge techniques, with a focus on progressive enhancement
- Highly collaborative environment working closely with developers and designers and **UX** experts, in a **Scrum** environment using the **agile methodology**
- Working with sites built in **.NET**, and multiple **Content Management Systems** including **Umbraco** and **Sitecore**
- Produce **responsive** and **adaptive** sites that look and perform well across the wide spectrum of **device sizes** and browsers

- Close **collaboration** with designers, developers and account team
- Collaborating with **overseas development teams**
- Visit my portfolio <http://www.pete-rawlings.com> to view some recent projects

#### **ECJ Technologies – Front End Developer / User Interface Developer – March 2011 / June 2011**

- Skinning and redesign of existing websites

#### **Ellamac Solutions - Web Designer / User Interface Developer – June 2009 / March 2011**

- Key role as the sole web designer / developer in a small design agency that prides itself on customer service and quality of work
- Design and development of websites from initial client liaison and design brief, to launch
- All aspects of project management which includes producing projects quotes and outsourcing tasks if required
- Latest front end coding techniques and supporting all modern browsers, back to IE6
- Having an excellent understanding of marketing strategies and concepts on the Web including the latest **Search Engine Optimisation** techniques
- Development in multiple Content Management Systems including **WordPress**

### Education and Qualifications

#### **Workshops / Conferences** [Web Directions South 2014](#)

HTML5 Beyond the Markup, John Allsop - Web Directions Workshop
